

# Starlight® Go Sport

The construction of both models Go Sport and Go Sport Plus are based on the sandwich principle, for absorption and distribution of all shocks and impacts.

A hard foam shell is worked into the protector on the outside of the occipital area. This is hit and splinter resistant, to absorb and spread any occurring forces in case of a backward impact.

The Go Sport, as well as Go Sport plus are made of high quality full-grain leather and sit firmly and secure on the head. Various fasteners and much more selectable, depending upon indication.

Choose between various shades of leather – Our high standards of quality apply also to colored leather!

The calf leather used for the lining is perforated, which is breathable, moisture and heat regulating as well as being very skin friendly.

*Head protection Starlight® Go Sport – basic model*

## Technical details

<b>Starlight® Go Sport</b>	
Forehead protection thickness	1,5 cm
Head circumference	Made to measure
Padding	Hard foam
Outer material	Leather
Lining	Leather
Product weight (basic model)	approx. 250 g
